Discover the music of the forest in this immersive introduction to classical music. Venture through the fern-filled and leaf-littered forest paths of the Frugal Forest, an installation made entirely from salvaged materials, and listen to the stories the forest people have to share. Deep in the forest stands a clearing where students will find themselves immersed by a unique and intimate classical music experience.

Featuring iconic music from renowned composers (including Wagner and Messiaen), this incredible music experience will introduce students to the instrument families and the ways in which music can be used to capture the sounds of an environment.

**From Australia**

“

The Frugal Forest is an intricately detailed forest installation made entirely from stuff that was headed for the dump. Why? Because nothing is wasted in the forest, and we could really learn from that.
