

Sydney Opera House Renewal

Function Centre

This premium space within the building envelope will be available to celebrate significant events and mark important occasions – from weddings and intimate gatherings to community and government events – in one of the world’s most spectacular locations.

The Function Centre will:

- Have capacity for 190 people seated and 500 standing and be available year-round, unlike the existing external function marquee, which is weather-dependent;
- Allow removal of the unsightly existing marquee from the Northern Broadwalk, which impedes external views of the building;
- Provide dramatic views of Sydney Harbour from the inside, with floor-to-ceiling windows and direct access to the Northern Broadwalk; and
- Include a 320 square-metre main function room and 250 square-metre kitchen.

Construction is expected to begin in 2018.
