

Sydney Opera House Renewal

CONCERT HALL

The Concert Hall upgrade will improve acoustics, accessibility, stage and backstage areas, and replace ageing theatre systems. It is the most significant work undertaken in the Concert Hall since the Opera House opened.

ENTRY & FOYERS

The Entry & Foyers project will transform the area under the Monumental Steps into a vibrant, welcoming, car-free entrance and meeting place. It will also upgrade the main box office foyer, adding seating, improving accessibility and streamlining functions.

FUNCTION CENTRE

This premium space within the building envelope will be available to celebrate significant events and mark important occasions – from weddings and intimate gatherings to community and government events – in one of the world's most spectacular locations.

CREATIVE LEARNING CENTRE

For the first time, children and young people will have a dedicated space at the Opera House to play, experiment and learn in a building that embodies creativity and innovation.

JOAN SUTHERLAND THEATRE

The Joan Sutherland Theatre upgrade will replace theatre equipment that has reached the end of its operational life, improving reliability, functionality and safety in the theatre. Additional works are proposed to improve the theatre's accessibility, acoustics, safety and functionality.
